Winter 2003

Our New Office!

After 25 years at our townhouse on Tunlaw Road, we moved our office about 1 mile to Foxhall Square on New Mexico Avenue.

Why did we move? The answer was to improve our quality of service to our patients. We had outgrown our townhouse, and were unable to add the necessary equipment to move forward.

Our new office design allows us to continue providing the highest quality comprehensive dentistry that we have committed ourselves to offer to our patients. We invested considerable time implementing present and future technology into our office.

We were able to upgrade to a fully computerized office with monitors in every treatment room. We added a computerized digital x-ray system, which provides an increase in diagnostic quality while decreasing the radiation level over 50%.

We are most excited about the quality space we have for our sterilization center, our new digital panoramic x-ray machine, and our consultation room, which will permit privacy for our patients.

We also provided our dental team with a functional, convenient, and comfortable working dental environment.

We love our new office and hope you will appreciate the change.

The New Year ... 2004

This is a very special time of the year! A season of joy, peace and love, when our staff is reminded how very privileged we are to count special friends like you among our many blessings. We are honored that you, our patients, have entrusted us with the responsibility of serving you and your family's dental healthcare needs. We are grateful for the confidence you have shown in us.

We hope your New Year's resolutions will include emphasizing the importance of good dental care at home, and we promise you that we will continue to provide the most excellent dental care possible!

At the beginning of this new year, we wish you good health, happiness and prosperity for the whole year!

Cosmetic Dentistry and Why You May Want It!

Think of the last time you posed for a picture. Did you flash your "pearly whites" or hide your teeth? If the look of your teeth is keeping you from feeling your best, there may be some simple and easy solutions. Cosmetic dental procedures include a wide range of techniques that can enhance any smile.

Some questions to ask yourself about your smile: Do you have any:

- Stained/discolored teeth or fillings?
- Any crowded or crooked teeth?
- Missing teeth? -Uneven teeth?
- Gaps between teeth?
- Chips, fractures or rough edges?

If you answer yes to any of the above questions, you can benefit from cosmetic dentistry. Call or visit us to find out which cosmetic procedures are best for you!

Welcome Dr. Catanzano

I am pleased and delighted that Dr. Joseph A. Catanzano, III, has joined our practice. Many of you have already met Dr. Catanzano on one of your recent visits. He is a very talented, delightful and dedicated dentist whose energy and fresh ideas will complement our dental team.

Dr. Catanzano grew up in Massachusetts and received his undergraduate degree in Psychology and Pre-Dental Studies from Georgetown University. He attended The University of Maryland Dental School and earned his dental degree, DDS, in 2000. He has spent the last three years as an associate in Arlington, Virginia.

I look forward to introducing Dr. Catanzano to each of you. We will review every ongoing treatment plan, along with diagnosing and planning future treatment together. Our office hours will remain the same, with the addition of Monday from 8am to noon. I hope you will feel comfortable scheduling with either of us at any time.

Together, Dr. Catanzano and I, with our extraordinary dental team, will continue to strive for excellence in dental care and service. Please join me in welcoming Dr. Catanzano at our new office, and thank you for the privilege of being able to provide you with excellent, comprehensive dental care.

Dr. Drumm "Best Dentist"

Congratulations to Dr. Drumm on being chosen as one of DC's "Best Dentists" by the Washingtonian Magazine. Dr. Drumm was also mentioned as "highly regarded for cosmetic work", and was quoted in the February 2003 article.
